

RETEACH

Goals of Reteach class, in this order

1. Reteach and retest benchmark objectives from previous quarter to students that did not master specific standards in math or reading until growth is shown (using the district benchmark retests).
2. Reteach current standards to students that did not master the district formative assessment in math or reading until mastery is demonstrated, using another common formative or the district formative (if two or more weeks have passed).
3. Remediate students that are struggling with basic grade-level skills.
